Subject: case 09/432503

Hi,

I would like to request the following searches (Cech et al.):

1. a standard search of seq id 2 in the protein databases (commercial and interference)

Thank you,

Delia M. Ramirez, Ph.D.

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.rnpm** and **.rnpr**

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapr**

The Pending database search results should not be left in the case because they contain data that is confidential.
